Interview Questions

1. Background information. You probably know most of this before the interview: name, place of employment, and email address.
2. Describe your engineering field.
3. What is your current job title?
4. Please describe your job and duties.
5. What is your average work schedule?
6. Please describe your educational path, from when you were my age to now.
7. Regarding your career or education, if you had it to do over, would you do anything differently?
8. What advice would you give me as a person interested in pursuing a career similar to yours?
9. In our class, we also learn about engineering ethics. Can you describe an ethical dilemma you have encountered at your job?
10. What did you do about the dilemma? How did you decide what to do?
