Coordinate Plane Printing Suggestions

Teacher Preparation Instructions for Poster Printing

To ensure students can clearly see and interact with the activity materials, enlarge the provided image on the following page and print it as a classroom poster.

Recommended Poster Size

- Print the image at 24" × 36" (Engineering Size D) or larger if space allows.
- This size provides clear visibility for small-group collaboration and whole-class instruction.

Lamination Recommendation

- It is highly recommended that all posters be laminated to increase durability and allow for repeated classroom use.
- Laminated posters can be written on with dry-erase markers and easily cleaned for future lessons.

Number of Posters Needed

- Print at least five (5) student-group posters so that each collaborative group has its own copy.
- Print one (1) additional teacher poster for modeling, demonstrations, and whole-class instruction.

If Your School Does Not Have a Laminator

- Consider using a local printing service such as Staples, Office Depot, FedEx Office, or a similar print center.
- Many printing services can enlarge, print, and laminate posters at a reasonable cost.
